

Construction Activity for May 15-22, 2011

Channel District Improvements Projects

The construction project along Washington Street is complete. Thank you, Channel District!

CH2M HILL and the entire Channel District Improvements Projects Team extend our gratitude to Channel District residents and businesses for your cooperation and patience during construction of two important City of Tampa CRA projects that are now complete: the York Street project (completed in November 2010) and the Washington Street project completed this week. With your help, everyone in the area now benefits from upgraded stormwater, wastewater and drinking water pipelines, upgraded and buried power lines, widened and improved sidewalks, new landscaping, new street lighting, and narrowed roadways to help slow traffic.

Thank you for your support and understanding during construction.

Sincerely,

The Channel District Improvements Projects Team
